

# THE BENEFITS OF UPDATES AND PATCHES

One of the best ways to protect the University from vulnerabilities is to keep software and applications up to date.

## Don't Delay

Are you one of those people who often ignore software update notifications that pop up on your screen now and then?

Cybercrime Protection

Fix Bugs and Malware

Better Security

Benefits from New Features

Decrease Downtime

## Prioritize It

Determine the best time in your routine to install updates. A few minutes every Friday afternoon can save a lot of time in the future.
