

# 4

## WAYS TO GROW UVA CYBER SECURITY CULTURE

### ACKNOWLEDGE YOUR RESPONSIBILITY

Cybersecurity involves every member of the University community - students, faculty and staff. No one department or individual can do it on their own.

### EDUCATE YOURSELF

When everyone is aware of potential threats - such as phishing scams, malware, and ransomware, they are more likely to be able to identify and take measures to prevent them.

### FOLLOW POLICIES, PROCEDURES, AND BEST PRACTICE

Familiarize yourself with University policies and procedures. Follow best practices like creating strong pass-phrases, updating software, and being cautious about what you share online.

### REPORT SECURITY INCIDENTS

Report suspicious activity quickly to [it-security@virginia.edu](mailto:it-security@virginia.edu) to help minimize potential damage to our online resources.

## STAY INFORMED, STAY VIGILANT TO EMPOWER AND PROTECT US ALL.
